

WHO DRIVES YOUR WARSHIP ?

And maybe even more important than that question is, who trained your driver? Modern warships resemble F1 racing cars in complexity. They are definitely more expensive and losing the race is infinitely more disappointing. Buying a state of the art ship is only part of the solution. The other part is getting a crew ready to sail and operate that ship effectively. Crucial in that part is the ability of warfare officers to drive a ship in such a way that his commanding officer can fulfil his mission.

WINNING IS ABOUT TACTICS

F1 races are won by those by with the combination of the best cars **AND** the drivers having the tactics to outsmart their opponents. But tactics are far more than just knowing when to push buttons. It also requires knowledge of the track, weather and opponents. Making the right choice at the right time produces winners.

“IN NAVAL WARFARE IT IS NO DIFFERENT”

NAVTRAIN’S MARITIME WARFARE COURSE

NAVTRAIN International’s **Maritime Warfare Course** offers a range of modules, educating and training your officers to become the best warfare officers.

I. **Tactical Module:** Starting at the tactical level it allows them to grow and become efficient leaders on board of your combatants

II. **Operational Planning Module:** A follow-on course to train your officers at staff level in naval operations

III. **Amphibious module:** A follow-on course to train your officers, naval and marines in Amphibious operations

NAVTRAIN also offers assistance in training your crew in bringing them to the required readiness level. Finally, we can support your navy at sea, in keeping that readiness high.

“HITTING A TARGET YOU CANNOT FIND IS VERY DIFFICULT”

IT BEGINS WITH TACTICS

Training naval officers in the principles of naval warfare is what NAVTRAIN can do for you. A highly intensive tactical course makes them thoroughly understand the tactical choices that can or must be made in a warship. Knowing how to build a recognized maritime picture, finding a contact in either an empty sea or an overload of data, outsmarting stronger opponents when they appear stronger, getting the initiative when under pressure, that is what you officers will learn.

HOW....?

JUST TURN THIS PAGE...

TRAINING PROGRAM

The tactical course covers eight weeks of intense learning and training. It starts with understanding ship, mission and environment, in order to understand how to build a maritime picture. It then introduces the basics in the three principal warfare types of naval warfare; Surface, Anti-air and Anti-submarine. The last three weeks brings all this together to test the student and enable him to rise above himself. Almost half of the time is spent training in specifically for this course designed games.

GRADUATING AS WARFARE OFFICER

Successfully finishing the course requires commitment, endurance and mental strength. It demands hard work and the ability to learn from mistakes. Only with these characteristics a student will graduate from NAVTRAIN tactical course. But only the very best can achieve a GOOD result. They are the ones that show the highest promise for the future. It is up to them to keep the promise for their navy.

PERSONAL TRAINING

Your students will be trained by some of the best tactical officers the Royal Netherlands Navy has produced. The course was designed and is supervised by a former RNLN Commander that also designed the RNLN PWO course and trained over a hundred officers. Students are given personal feedback during the course and may give feedback themselves as NAVTRAIN aims to continuously improve and remain up to date. Naval authorities will be asked to assist in that feedback, because we aim to deliver you the drivers for your warships.

MORE THAN JUST TRAINING

Taking breaks is effective training, more than using every hour available in class. The students will receive enough rest while maintaining a high tempo. These resting periods might be an hour for study, or if necessary, it can be used for personal assistance. In addition, days or occasional afternoons are planned to enjoy the cultural, scientific or innovative capabilities in the Netherlands. Charging your battery is essential...
